

CASE STUDY

Customer Profile

Mycron Steel Berhad

Overview

Mycron Steel Berhad (MSB) was incorporated in Malaysia under the Companies Act 1965 on 24 July 2003 as a public limited company. MSB's principal activities consist of investment holding and the provision of management services to its subsidiaries.

Industry – Steel Manufacturing

Hardware – Sangfor M5100 Firewall

Sangfor M5100 Advantages - a) Excellent performance b) Reasonable Price

Sangfor M5100 provides the cheapest VPN for Mycron Steel Berhad.

“It saves us so much money and effort after migrating to Sangfor for VPN instead of ISDN network provided by Telekom Malaysia.”

Mr. Tang Ang Leng - Senior IT Manager, Melewar

The Challenge

Mycron since year 2021 has looked into cutting cost of ISDN currently used in factories. ISDN was an old technology. Furthermore, the rental cost was expensive.

The Solution

Paraframe has recommended Sangfor M5100 to build IPsec VPN (IPSec VPN) network and to replace Mycron's ISDN network. IPsec VPN which does not require subsidiaries pay for fixed IP address of VPN network. This in turn saves money for MIG.

Subsidiaries which have migrated to VPN are Mycron Steel CRC Sdn Bhd and Melewar Steel Tube Sdn Bhd. Currently two subsidiaries' VPN network are very stable. Melewar Factory 2 & 3 will be the next in the pipeline.
